- Produces 4-5 SMME businesses operating in the community
- TVET is procuring via the above Suppliers - target to get to 10
- 32 PC used by Community, Entrepreneurs, TVET students
- 14 Engineering Student Finishes 32 Course 3 Days !!

Solar Systems Installation completed successfully.

Date of the Installation : Sunday the 11th June 2023.

Date of testing & sign off : Tuesday the 13th June 2023

How we Go Beyond together

Donation Food& Trees for Africa

With regards to the tree planting initiative, your efforts have allowed us to donate a substantial amount towards Food & Trees for Africa.

Food & Trees for Africa (FTFA) is a leading Section 21 Non-Profit Organisation that addresses **food security**, **environmental sustainability**, and **greening**. Their core purpose is to improve lives and landscapes towards healthy people on a healthier planet. They have a large and diverse [programme portfolio](#) with community projects active across South Africa since 1990.

Their founding objectives include:

- Contribution to food security, greening, natural resource management, and sustainable business.
- Education and training learners, teachers, and communities of Southern Africa.
- Promote environmental activities within all sectors of society.
- Promote sustainable economic development and enhance livelihoods.
- Build capacity and skills within agriculture, urban forestry, and climate change adaptation.

With your contribution to the incentive, we have been able to support the award-winning Trees for All Programme which focuses on planting indigenous and fruit trees in shared spaces across South Africa.

Shared spaces include schools, clinics, hospitals, aged homes, parks and environmental / wildlife corridors

This successful initiative educates communities about the benefits of trees, while offsetting carbon emissions and transforming the surrounding environment

What is a tree distribution?

- A Trees for All distribution is for you who want to green communities in a meaningful way
- FTFA will identify and assess beneficiaries and deliver trees and compost to them for planting

We will send you pics to let you know how your trees are doing.

Thanks again for supporting our HP Sustainability Impact programme, making sure we make a difference to the planet.

“The betterment of our
society is not a job to be left
to the few. It is a responsibility
to be shared by all.”
